SUMMARY

Ambitious Information Science undergraduate with a strong passion for Java & Python Development, Networking, Full-Stack Development, AI/ML, Cybersecurity, and Data Analytics. Skilled in building scalable and secure applications, with a deep interest in solving complex real-world problems through innovative and data-driven solutions.

EDUCATION

B.E in INFORMATION SCIENCE AND ENGINEERING , SRI VENKATESHWARA COLLEGE OF ENGINEERING (CGPA: 9.04)	Nov '22 — Present BENGALURU, India
Pre-University (PCMC) , Government PU College Yelahanka (PERCENTAGE: 91.33%)	BENGALURU, India
ICSE, NEW BALDWIN SCHOOL (PERCENTAGE: 90%)	BENGALURU, India

CERTIFICATIONS

Introduction to Cybersecurity , Google(via Coursera)	Dec '23
Data Analytics Job Simulation , Deloitte(via forage)	Feb '25
Create your first Web app with python and flask , Coursera	Dec '23
Cyber Job Simulation , Deloitte(via forage)	May '25
Introduction to Machine Learning , NPTEL	May '25
Introduction to Golang , SIMPLILEARN SKILLUP	Jul '25
Software Engineering Job Simulation , Accenture(via forage)	Jun '25
Artificial Intelligence Search Methods for Problem Solving-IIT Madras , VTU-Center for Online Education	Jul '25

ACHIEVEMENTS

Completed Deloitte Australia's Data Analytics Job Simulation

Gaining hands-on experience in data insights and reporting.

Won First Place in College Idea Pitching Event

Showcasing innovative problem-solving and presentation skills.

Participated in GDSC Club Events

Working with Google Cloud, gaining practical experience in cloud-based development and deployment.

I participated in the SIH 2024 Internal Hackathon at my college and secured 7th place

I took part in the Build for Bengaluru Hackathon at SKIT Bangalore and was honored to be among the top 20 finalists.

Completed Deloitte Australia's Cyber Job Simulation

Gained hands-on experience in cyber threat detection by analyzing access logs, identifying suspicious request patterns, and investigating unauthorized API usage.

I took part in the HackSpark 2025 Hackathon at SVCE Bangalore and was honored to win 2nd place for our innovative tech solution.

PROJECTS

ConnectBook - Academic Management Platform [Link](#)

- A comprehensive academic platform with features like Grade Master, Smart Attendance, Lecture Short Notes, Career Adviser, and Mentor Connect, enhancing student-teacher collaboration.
- Engineered a React dashboard with interactive UI and real-time analytics for student performance tracking.
- Developed a secure authentication system using JWT, ensuring role-based access for students, teachers, and parents.
- Utilized local storage for data management, enabling offline access and quick retrieval.
- Tech Stack: React — Node.js — Python — MongoDB — Express.js — Tailwind

Interview & Internship Simulator [Link](#)

- A platform providing mock interviews, automated scoring, and real-world internship tasks, helping students improve employability skills.
- Built an AI-powered interview simulator, providing instant feedback on answers with dynamic scoring.
- Designed an interactive UI using React, improving usability and engagement by 40%.
- Implemented secure REST APIs with Express.js and MongoDB for data storage, ensuring seamless backend operations.
- Tech Stack: React — Node.js — Python — MongoDB — Express.js — Tailwind

RideWithUs – Carpooling Made Easy [Link](#)

- A simple and user-friendly carpooling platform that helps people share rides, save travel costs, and reduce traffic.
- Built a clean and responsive user interface using React for booking and offering rides.
- Designed basic ride matching based on pickup and drop locations.

- Used local storage to keep user data handy and improve performance.
- **Tech Stack:** React — Node.js — Express.js — Tailwind

Personal Portfolio Website [Link](#)

- A visually appealing portfolio showcasing **projects, skills, and achievements** with a modern UI.
- Designed a **fully responsive UI** using **HTML, CSS, and Tailwind**, ensuring seamless viewing on all devices.
- Implemented **smooth animations and interactive components**, enhancing user engagement.
- **Tech Stack:** HTML, CSS, Tailwind, JavaScript

Inspectrix – All-in-One Comparison & Review Analyzer [Link](#)

- A powerful web platform that simplifies decision-making by analyzing reviews, prices, ratings, and features across businesses, products, and services.
Developed a dynamic React interface with search and filter capabilities for products, transport, hospitals, and restaurants. Built a robust backend with Express and MongoDB to support user authentication, post creation, business registration, and real-time comparison analytics.
Implemented a smart analyzer that suggests the best option based on reviews, price, and ratings, highlighting the top choice and best payment methods.
Integrated a chatbot for user guidance and product explanations, enhancing interactivity and user experience.
- Tech Stack: React — Node.js — Python — Express.js — MongoDB — Tailwind CSS

Crowd Safe Security System [Link](#)

- An AI-based platform designed to predict and prevent stampedes during high-risk public gatherings like political rallies, celebrity events, and sports matches.
- Built an AI-driven crowd density prediction system, enabling real-time risk alerts and venue suitability analysis.
- Developed a multilingual voice-enabled chatbot and an intuitive map-based UI using React, enhancing public accessibility and engagement.
- Implemented role-based access and real-time communication between police, organizers, and the public using secure REST APIs and WebSockets.
- Tech Stack: React — Node.js — Python — MongoDB — Express.js — Tailwind — Google Maps API — Web Speech API

SKILLS

Programming Languages Java, Python, C, JavaScript, React, Golang, Node.js, Express.js, REST API

Database Management MySQL, MongoDB

Data Visualization PowerBI, Tableau Desktop

Machine Learning Python (NumPy, Pandas, Matplotlib, Seaborn), Scikit-learn, Data Visualization, PCA, KNN, Regression (Linear & Polynomial), Decision Trees, Naive Bayes, K-Means Clustering, Model Evaluation (Accuracy, MSE).

Version Control GIT, Github

Interests Sudoku, Watching Movies

Languages English, Telugu, Kannada, Tamil
